Message from the Chairman

It is my pleasure to present the Annual Report of Skill Council for Mining Sector (SCMS) for the year 2021-2022 which has been very contributory and rewarding. The key focus areas have been continued alignment with Skill India Portal (SIP), upgrading the SCMS web site, revision of Qualification Packs (QPs) and creating system driven question banks for many job roles. Happy to inform members and all the stake holders key highlights and achievement during last fiscal.

On training front, glad to inform that during the reporting period, SCMS has certified 19 Trainers, 7 Master Trainers, 30 Assessors & 8 Master Assessors with overall 213 certifications. Besides this, SCMS has imparted RPL to 1,197 candidates out of which 1,101 were certified. With regard to Short Term training, 1,151 candidates were trained out of which 985 certified.

Pleased to inform that the application submitted by SCMS to NCVET in June 2020 has been considered and approved as 'Awarding Body' in February 2022.

A part of the DMFT project commenced in Angul /Odisha on 6th October 2021 has been completed in Feb 2022. SCMS have trained & certified 150 local youths in the trades of Mine Electrician, Mine Welder and Dumper operators. Now the assessed trainees are in the process of placement and wish that most of them will be absorbed by surrounding mining industries.

Happy to notice that based on internal research & industry's demand, SCMS is creating 6 new Qualifications:

 Coal Bed Methane Extractor, 2. Down-the-hole/Long hole (DTH/LH) Drill operator, 3. Heavy Earth Moving Machinery (HEMM) Electrician, 4. Low Profile Dump Truck Operator (LPDT),
 Slurry Pump Operator, 6. Mine Foreman/Overman. Hope these will be validated by member industries and approved by NCVET during next quarter.

SCMS has successfully completed its flagship pilot project of skill development of the local youths at Northern Coal Fields Ltd, Singrauli. Currently 470 candidates including 22% diversity are undergoing apprenticeship training in NCL in optional trades of Data Entry Operator, Mine Electrician, Mine Welder, and HEMM Mechanic.

SCMS have entered into an MoU with SANGAM University, Bhilwara (Rajasthan) and Medhavi Skill University (Sikkim) to commence Diploma in Mining (vocational) course from the academic year 2022-23. SCMS will facilitate for "on-the-job & apprenticeship training, assessment and certification.

Lastly, I take this opportunity to thank all the members of Governing Board for their continued suggestions and support to SCMS.

3. Overview of the Mining Sector

The Mining sector in India is expected to witness a major reform in the next few years, owing to reforms such as Make in India Campaign, Smart Cities, Rural Electrification, and a focus on building renewable energy projects under the National Electricity Policy as well as the rise in infrastructure development. Minerals are valuable natural resources that are finite and non-renewable. The history of mineral extraction in India dates back to the days of the Harappa civilization. The wide availability of minerals in the form of abundant rich reserves and the eco-geological conditions make it very conducive for the growth and development of the mining sector in India.

Mining is a major economic activity which contributes significantly to the economy of India and accounted for 2% of the country's gross value added (GVA) for the third quarter of 2019 to 2020. The sector provides the basic raw materials required by several manufacturing and infrastructure industries in the country. It is considered as the backbone of the manufacturing sector, be it steel, cement, power, high-tech ceramics for spacecraft, energy efficient equipment for combating climate change, smart phones, TVs, etc. Raw materials such as iron, limestone, bauxite, chrome, manganese, rare earth elements are mined for to support these various crucial sectors of the economy. Therefore, it is believed that 'Make in India', will be boosted by 'Mining in India'.

India produces as many as 95 minerals which including 4 fuel, 3 atomic, 10 metallic and 23 non-metallic minerals and 55 minor minerals (including building and other materials). There continues to be a huge demand for minerals in view of the rapid urbanization and growth in the manufacturing sector in India. India occupies a dominant position in the production of many minerals across the globe.

The broad categories of minerals produced in India are as follows:

As per the first advance estimates national income for 2021-22 released by the National Statistical Office, Ministry of Statistics and Program Implementation, the 1st Advance Estimates of Gross Value Added (GVA) of mining and quarrying sector during 2021-22 at 2011-12 prices is Rs 336859 crore, which shows a growth of 14.33% as compared to Provisional Estimates of GVA during 2020-21 at Rs 294644 crore. The mining sector contributes nearly 2.4 per cent to India's GDP.

Indian mining industry is characterized by a large number of small operational mines. The number of mines which reported mineral production (excluding atomic, fuel, and minor minerals) in India was 1,332 in 2020-21 as against 1,385 in the previous year. Out of 1,332 reporting mines, most of the mines reported are in Madhya Pradesh followed by Gujarat, Karnataka, Odisha, Andhra Pradesh, Chhattisgarh, Tamil Nadu, Rajasthan, Maharashtra, Jharkhand and Telangana. The numbers of reporting mines along with Area-wise distribution of Mining Leases all over India pertaining to all minerals excluding fuel, atomic and minor minerals is given in below table.

4. Skill Ecosystem

The skill development ecosystem in India is complex, large and diverse, providing varied levels of skills across an extremely heterogeneous population. Skill development in India can be broadly segmented into Education and Vocational Training.Our National Skill Mission is chaired by the Hon'ble Prime Minister, Shri Narendra Modi.

India is one of the youngest nations in the world with over 66% of the population in the working age group and about 54% of the population below 25 years of age. This highlights the need to enhance the skills of the available workforce to improve their employability and contribution to the economic growth of the country.

The Skill Mission launched by the Prime Minister on 15 July 2015, has gathered tremendous steam under the guidance of Minister for Skill Development and Entrepreneurship and Minister of State, MSDE.For the first time since India's independence, a Ministry of Skill Development & Entrepreneurship (MSDE) has been formed to focus on enhancing employability of the youth through skill development.

The National Skill Development Mission

The National Skill Development Mission was launched by the Hon'ble Prime Minister on 15.07.2015 on World Youth Skills Day. The Mission has been developed to create convergence across sectors and States in terms of skill training activities. Further, to achieve the vision of 'Skilled India', the National Skill Development Mission would not only consolidate and coordinate skilling efforts, but also expedite decision making across sectors to achieve skilling at scale with speed and standards.

It will be implemented through a streamlined institutional mechanism driven by Ministry of Skill Development and Entrepreneurship (MSDE). Key institutional mechanisms for achieving the objectives of the Mission have been divided into three tiers, which will consist of a Governing Council for policy guidance at apex level, a Steering Committee, and a Mission Directorate (along with an Executive Committee) as the executive arm of the Mission. Mission Directorate will be supported by three other institutions: National Skill Development Agency (NSDA), National Skill Development Corporation (NSDC), and Directorate General of Training (DGT) – all of which will have horizontal linkages with Mission Directorate to facilitate smooth functioning of the national institutional mechanism

National Skills Qualification Framework

To integrate general and vocational system of education and training, the National Skills Qualification Framework (NSQF) was notified on 27th December 2013. The National Skills Qualifications Framework (NSQF) is a competency-based framework that organizes all qualifications across ten levels, defined in terms of learning outcomes obtained through formal, non-formal or informal learning. Each level representing a different level of complexity, knowledge and autonomy required to demonstrate the competence commensurate for that level. It is a quality assurance framework. Recognition of Prior Learning (RPL) is an important associated function.

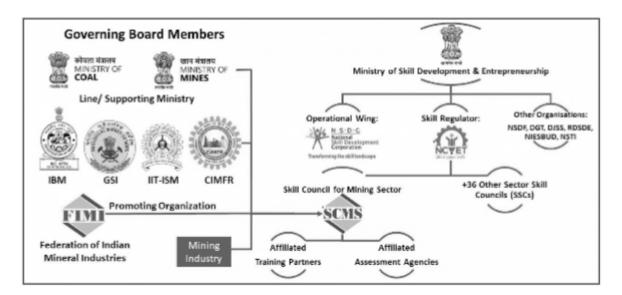

The key elements of National Skill Qualification Framework are:

- National principles for recognizing skill proficiency and competencies at different levels leading to international equivalency.
- Multiple entry and exit between vocational education, skill training, general education, technical education and job markets.
- Progression pathways defined within skill qualification framework.
- Opportunities to promote lifelong learning and skill development.
- Partnership with industry/employers.
- A transparent, accountable, and credible mechanism for skill development across various sectors.
- Increased potential for recognition of prior learning.

In line with this vision, skilling in India has transformed from a disbursed and distributed model with multiple government bodies to a cohesive and unified model under the Ministry of Skill Development and Entrepreneurship. Skilling in India is seeing some great reforms and policy interventions, which are reinvigorating and re-energising the country's workforce and are preparing the youth for job and growth opportunities in domestic as well as international markets.

The Ministry of Skill Development and Entrepreneurship (MSDE) is responsible for coordination of all skill development efforts across the country, building of new skills and skill upgradation, and encouraging entrepreneurship. The Ministry aims to skill on a large scale with speed and high standards in order to achieve its vision of a 'Skilled India'.

It is aided in these initiatives by its functional arms – National Skill Development Agency (NSDA), National Council for Vocational Education and Training (NCVET), National Skill Development Corporation (NSDC), National Skill Development Fund (NSDF) and 37 Sector Skill Councils (SSCs). The Ministry is also working with the existing network of skill development centers, universities, and other alliances in the field. Below figure explains the overall skill ecosystem:

5. Skill Council for Mining Sector at a Glance

Skill Council for Mining Sector (SCMS) promoted by FIMI and supported by Ministry of Mines was established in December 2013 as the apex body to train and meet the requirement of skilled workforce for the mining industry in PPP mode, setup by National Skill Development Corporation (NSDC) under the Ministry of Skill Development & Entrepreneurship (MSDE).

SCMS is a registered company under Section 25 of Companies' Act 2013 and has been issued 80G certificate & 12AA certificate under income tax 1961 in October 2015. This allows SCMS to undertake training under Corporate Social Responsibility (CSR) Projects for the various companies.

The core activity of SCMS is to formulate the National Occupational Standard (NOS) for different job roles aligned to National Skills Qualifications Framework (NSQF) notified by Government of India, in December 2013.

Ministry of Skill Development and Entrepreneurship (MSDE) in its notification dated 17th March 2015 has authorized SCMS as a non-statutory agency for certifying the mining workforce in India.

SCMS has a key mandate to create a pool of Trainers and Assessors for successfully and effectively executing the skill development programs. SCMS regularly organizes Training of Trainers (TOT) and Training of Assessors (TOA) programs to meet these requirements.

CEO-SCMS is designated as Joint Apprentice Advisor (JAA) for Optional Trades vide MSDE notification no MSDE-01/(3)/2018-AP(PMU) dated 12 September 2018.

SCMS is an awarding body which is recognized and regulated by NCVET under the aegis of MSDE.

As India moves progressively towards becoming a global knowledge economy, it must meet the aspirations of youth and aim towards skilling them with the best possible standards. The formulation and launch of Guidelines for Accreditation, Affiliation, and Continuous Monitoring of Training Centres in year 2016 was the initial step in this direction.

Training initiative of SCMS is not just to ensure availability of certified workers to improve standards of productivity and safety but also to guide and assess the infrastructure and training capability of Training Centers to provide quality skill training. SCMS has 29Training Partners and 8 Assessment Agencies. It has carried out a series of Training of Trainers (TOT) and Training of Assessors (TOA) programs and created a large pool of Trainers and Assessors with a total of 65 trainer certifications and 148 assessor certifications during the year 2021-22.

SCMS Operating Model

SCMS Engagement with Industry and Government:

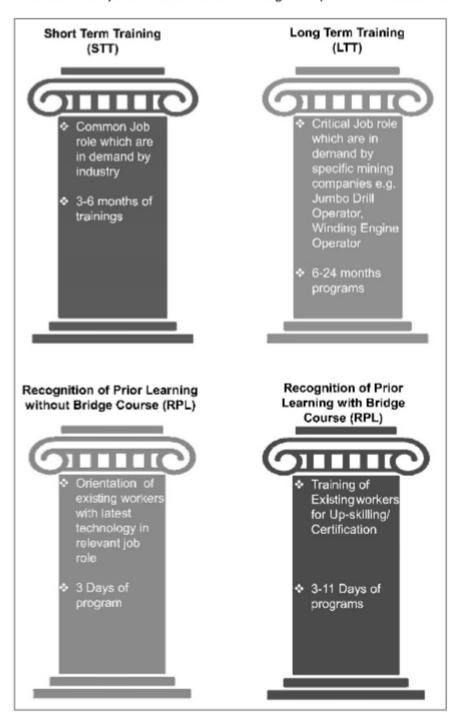

SCMS is working closely with the Industry and the Government on multiple projects for Skill Development.

Industry Funded Projects: Under this, SCMS is working on refresher training & upskilling and certification of existing workforce in the industry as per NSQF Levels. The industries currently engaged with are MOIL, NLCIL and NCL. SCMS is also engaging directly with the industry, both PSUs and Private Sector for imparting refresher training to their existing workforce. The objective being, to train the candidates to attain higher proficiency in their trades and provide the mandatory experience required for appearing in the Statutory Exam, so that they will be job ready from day 1 of their employment. This will make skill development aspirational for candidates and provide value to the industry in the long term.

10. Focus Area FY2022-23

Virtual Reality (VR)

Looking to the industry demand, newer technologies, availability and high cost of equipment, SCMS is exploring to induct and convert contents of qualification files into VR mode. This will be based on cloud computing, easy to carry and upload, quick to learn with head gears and enhance learning graph with lot of safety and feeling of having working in real mining world. Here is the brief background and our preparation to look forward.

Virtual reality technology plays an important role in realizing Tele sensation. Through it, a virtual world is created that viewers can enter and walk through and where they can handle virtual objects. The virtual world allows us a stereoscopic view from front or side, depending on our viewpoint, just as in the real world. The ability to enter and walk through the virtual world and handle virtual objects using hand gestures makes VR interactive, and this is one of its most important features.VR helps enhance learning by allowing students to interact with their lessons and experience it in different ways. Instead of just reading about a subject, students are able to see the things they are learning, helping students understand complex topics.

In this regard, Skill Council for Mining Sector has released advertisement for Request for Proposal (RFP) for Development of Virtual Reality (VR) Contents for Job Roles in Mining Industry, on 6th July, 2022 in Times of India- Delhi, NCR. The RFP Document was hosted on SCMS website as well on the same day. The Scope of Work involves design and development of VR Content for following 5 (five) job roles:

- 1. Dumper/Tipper Operator
- Excavator Operator
- Jumbo Operator
- Loader Operator
- Mine Electrician

We got good response and out of 10 bidders, 6 qualified for commercial bid and finally lowest bidder has been awarded work order on 31st August, 2022. We hope to get the contents developed by Nov/Dec 2022.

Futuristic job roles

The vision of GOI is to make India the Skills Hub for the world while tapping the opportunity of providing rightly skilled workforce to the nation and the globe by plugging the deficit in existing and future skills. The future skills form a considerable part of this set and requires a focused and calibrated approach for adoption in the Skill India Mission through approaches of reskilling, upskilling and fresh skilling. The need of the hour is an industry-led, government approved skilling ecosystem in emerging & future technologies to enhance employability and stay relevant.

In this regard, Skill Council for Mining Sector has drafted new/futuristic Qualification Files of following 6 job roles which are to be approved from NSQC:

- 1. Coal Bed Methane Extractor
- 2. Down-the-Hole/Long Hole (DTH/LH) Drill Operator
- Heavy Earth Moving Machinery (HEMM) Electrician
- 4. Low Profile Dump Truck (LPDT) Operator
- Slurry Pump Operator
- Mine Foreman/Overman

SCMS has planned to create Qualification Files for following new/futuristic job roles:
